

Jay Womack, ASLA, LEED AP

Director, Landscape and Ecological Design

Mr. Womack, with over 25 years of experience, has a professional background that reflects his lifelong affinity for the natural areas of the Midwest. His design process is based on an understanding that every site contains a unique and ever-changing part of the global system. Therefore, every design solution requires innovation that is achieved through the partnership of environmental and economic growth. Mr. Womack is also an Adjunct Professor at the Illinois Institute of Technology where he teaches two courses in the landscape architecture department; both focus on the integration of ecology into design.
